

Main Dentist

CONSISTENT CARE IS KEY

Learn about what a Main Dentist is and how they are an integral part of your child's long-term dental health.

WHAT DOES A MAIN DENTIST DO?

Your child's Main Dentist provides complete dental care for your child. They should be your first call for your child's dental care needs. The Main Dentist can treat most dental issues or can recommend a specialist, if necessary.

Look to your Main Dentist for help with:

Designing a dental health plan.

Information about growth and diet.

Learning to care for your child's teeth.

WHY IS A MAIN DENTIST IMPORTANT?

Keeping the same Main Dentist will help your child feel more comfortable during visits. They will know your child's dental history and how to keep your child's mouth healthy. Your child should see their Main Dentist every six months starting at age one. These checkups are provided at no cost.

HOW TO CHANGE YOUR MAIN DENTIST

It's easy to switch your child's Main Dentist at any time.
