PREVENT CAVITIES IN EARLY CHILDHOOD

Tooth decay can be caused by drinking milk or juice from a bottle or sippy cup. Children who drink from a bottle or sippy cup while laying on their back are more prone to ear infections.

Here is what you can do to prevent tooth decay:

- Do not put your baby to bed with a bottle of milk or juice in their mouths.
- If you use a bottle as a pacifier, make sure you only add water to the bottle.
- Teach your child to drink from a cup by the time they are 12 months old.
- If your baby does not have teeth, gently wipe baby's gums with a clean, damp, soft washcloth or gauze after each feeding.

Good home care and regular dental visits can keep your family healthy. If you need help finding a dental provider or have questions about your dental benefit call DentaQuest at **855-418-1622**.

If English is not your first language or you need help reading this letter, language interpretation and translation are available to you at no cost.

REPORTING FRAUD AND ABUSE
