

About DentaQuest

DentaQuest is one of the leading oral health enterprises in the U.S. but unlike other oral health organizations, we are a family of four distinct entities that all work towards achieving our single mission – **to improve the oral health of all.**

We work to address oral health inequity from four distinct perspectives – **DentaQuest**, the business unit providing benefits administration; the **DentaQuest Foundation**, the leading oral health philanthropy in the country; the **DentaQuest Institute**, a national research institute providing clinical care and practice management support; and the **DentaQuest Care Group**, dedicated to increasing access to care in underserved communities.

DentaQuest Benefits Administration

DentaQuest partners with states and health plans to provide high-quality, cost-effective program administration in every arena of dental and vision benefits, including Medicaid, CHIP, Medicare Advantage, health exchange, group and individual plans. DentaQuest is the largest administrator of government-sponsored dental programs. Today, we serve 22 million government-sponsored program members in 30 states on behalf of 100 health plans and eight state agencies.

DentaQuest Foundation

The DentaQuest Foundation is the leading U.S. philanthropic foundation focused solely on oral health. The Foundation is responding to the need to make oral health a priority at the national, state and community levels by fostering the development of a national network of oral health advocates. Through its Oral Health 2020 initiative, the Foundation aims to bring about lasting systems change through the power of collective action.

DentaQuest Institute

The DentaQuest Institute is changing the future of oral health using robust scientific and clinical research to improve the delivery of care. The DentaQuest Institute's work is focused on achieving the Triple Aim, making sure patients get the right care, at the right cost, with the right outcome.

DentaQuest Care Group

The DentaQuest Care Group is the newest addition to the DentaQuest family – a not-for-profit organization dedicated to developing, managing and improving systems for the delivery of quality health care to underserved communities and to increasing access to quality care in those communities.

to improve the oral health of all
